DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3754

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,901,886 to Kirschnes.

Kirschnes shows a dispenser 210, a gear pump housing 236 with an inlet 232 and outlet 238, reservoir 214, an electric motor 234 that rotates by means of a changing magnetic field and mechanically connected to the pump, a concentrate bag 508, a rotor 344 driven by a changing magnetic field created by the magnets as seen in Figs. 18.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-11, 15, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,901,886 to Kirschnes in view of US 6,065,946 to Lathrop.

Kirschnes shows all claimed features as discussed above except for the rotor driving the gear pump. Lathrop shows a controller pump as seen in Fig. 4 and a rotor 52 driven by a plurality of magnets 58. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Kirschnes to drive the gear pump using a rotor in the flow path as taught by Lathrop to preserve the integrity of the electric elements, lowering maintenance cost and enhance resistance to environmental degradation, see column 5 lines 13-29.

Art Unit: 3754

Allowable Subject Matter

5. Claims 16, 17, 18, 21, 22 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schenmeyr shows a liquid dispensing system. Altham shows a multiple-chamber gear pump. Sevrain shows an integral electronically communicated drive system. Dickey shows a submerged rotary type fuel pump. Bowes shows a magnetic drive.
